

I am writing with regards to the FCC's proposal to expand LPFM service which could negatively impact my reception of KLOVE radio heard in my area on 89.9, 91.9 and 88.1. KLOVE radio supports wholesome family values and has a positive and encouraging impact on communities all across America. It is critical that the reception of these stations not be impacted, leaving our area without the KLOVE signal. Please do not take away this clean, positive and encouraging station in order to provide access to many other stations that contain content often unsuitable for child and families.
